Thanks, James. We'll do that.

Terrie, to be more specific in my reply. Table 3: off site sampling list the EPA monitoring parameters. All are correct except for particulate monitoring for 2.5 using the datarams. This testing is incorporated into the high volume samplers and is part of the radiation monitoring. Please strike that line from your table, thanks.

Subject: TASC fact sheet for review

Hi James,

I received your voice message today. The fact sheet for review is attached. I have told the CAG that it is on hold pending EPA approval of the final QAPP. I haven't received any response about the delay from the CAG. I don't think it is a major concern at this time.

Thanks.

Terrie
